Microtome Edge

Wavecut

Supreme Cut Scissors

The combination of the renowned Elite Tungsten Carbide technology with the Elite Noir coating results in an extremely high surface hardness and therefore high wear resistance in daily hospital use.

- Microtome edge
The extremely sharp cutting edge of the scissors blade facilitates gentle cutting of tissue with minimal use of force.
- Wavecut helps prevent tissue from slipping out during the cutting process.
- The **WB** after the item number indicates the scissors are the wavecut style, e.g.

TC Micro Needle Holders

Elite features Needle Holders with Tungsten Carbide (TC) inserts. A smooth jaw and three different serration patterns are available, depending on the size of the suture needle.

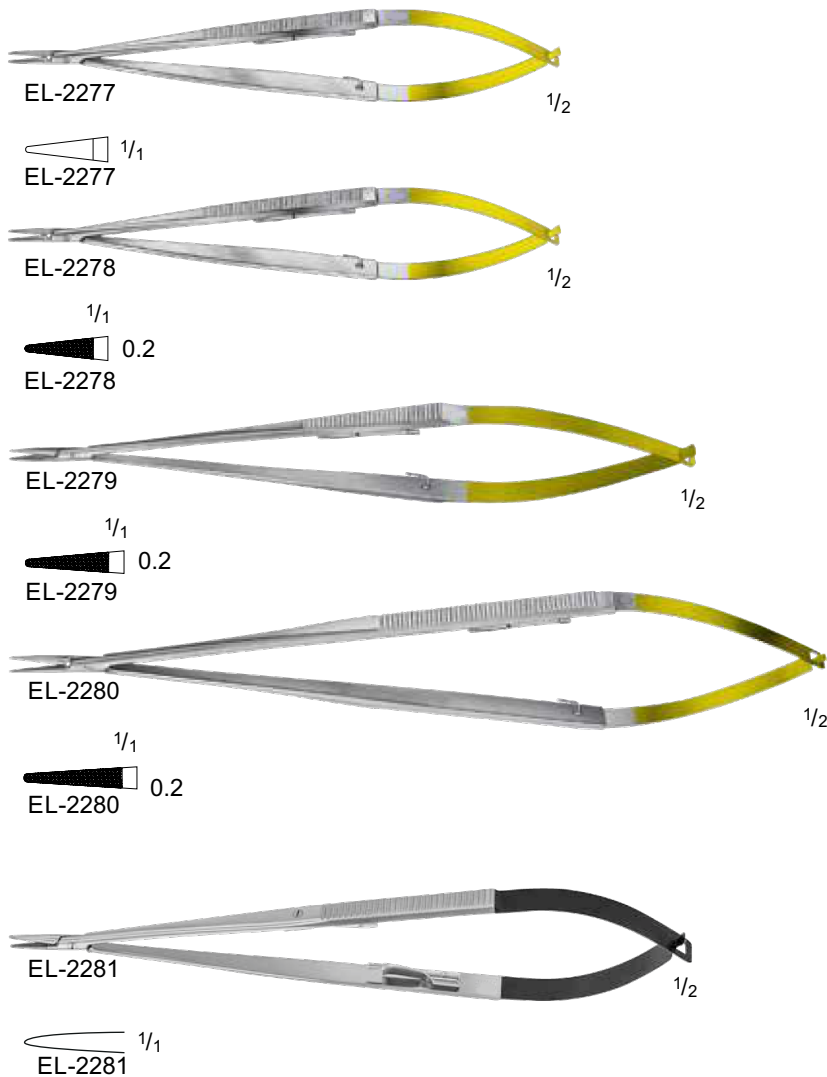

We recommend carbide inserts as follows:

Jaw Surface	Suture Material
Smooth	9/0 - 11/0
0.2 mm pitch of serration	6/0 - 10/0
0.4 mm pitch of serration	4/0 - 6/0
0.5 mm pitch of serration	up to 3/0

Titanium Micro Needle Holders

Elite Titanium Micro Instruments

- The extremely light Titanium material is an advantage for lengthy cardiac and vascular operations. This helps to carry on operating over longer time periods with minimum fatigue.
- The non-magnetic material makes working with particularly fine needles easier for you.
- Non-reflecting surface finish.
- Incomparable operating sensitivity: the Elite golf ball handle design.
- Unmistakable identification: the Elite color code.

All needle holder jaws are coated with Elite diamond dust coating. This coating ensures that the inner surfaces provide the best possible performance in hardness and wear resistance. The texture of the jaws greatly increases its surface area, allowing you to grasp fine needles, sutures and soft tissue safely and securely. The needle quickly aligns itself in an ideal position in the rough surface. This results in a perfect grip that quite simply prevents any needle slippage.

Cardiovascular

Titanium Forceps

Elite Titanium Micro Instruments

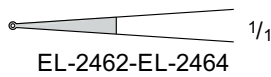

- The extremely light Titanium material is an advantage for lengthy cardiac and vascular operations. This helps to carry on operating over longer time periods with minimum fatigue.
- Non-reflecting surface finish - for optimal glare reduction.
- The Elite golf ball handle design - gives incomparable operating sensitivity.
- The Elite color code - provides unmistakable instrument identification.

All titanium forceps jaws are coated with Elite diamond dust coating. This coating ensures that the inner surfaces provide the best possible performance in hardness and wear resistance. The texture of the jaws greatly increases its surface area, allowing you to grasp sutures and soft tissue safely and securely.
